## M Geller Ltd – Russian Diamonds Policy

As Russian's devastation war on Ukraine drags on, M Geller Ltd. chooses to support the Ukrainian people by asking our diamond vendor partners to certify that they will not be providing M Geller Ltd with diamonds that were mined or manufactured in Russia.

M Geller Ltd. believes that diamonds sourced from Russian Mines are essentially like "conflict diamonds" and the purchase of said diamonds would be like funding conflict against a peaceful neighbor. Although Russian diamonds do not fit the narrowest industry definition of "conflict diamonds, which refers to those used to fund rebel groups," we clearly feel that they fit the spirit of the term.

The Kimberly Process (KP) was originally set up to try to keep conflict connected diamonds out of the supply chain and although the KP has not yet issued any formal rulings in response to this crisis, we feel it is only a matter of time before all major jewelry supply chains issue their own sanctions against Russian diamonds.

We feel that it is important to be transparent and have added a statement to the bottom of all our invoices that states "The seller hereby guarantees that the diamonds or manufactured finished product invoiced and/or sent by memo and contained herein, were not mined or manufactured in Russia."

We require our Diamond Vendor Partners to join us in support of the people of Ukraine and make your own commitment to stop the sale of diamonds mined or manufactured in Russia. We would appreciate your written assurance that you will join us. We cannot be silent in this time of great tragedy.
